How to manage internal memory of your tablet with using your computer:
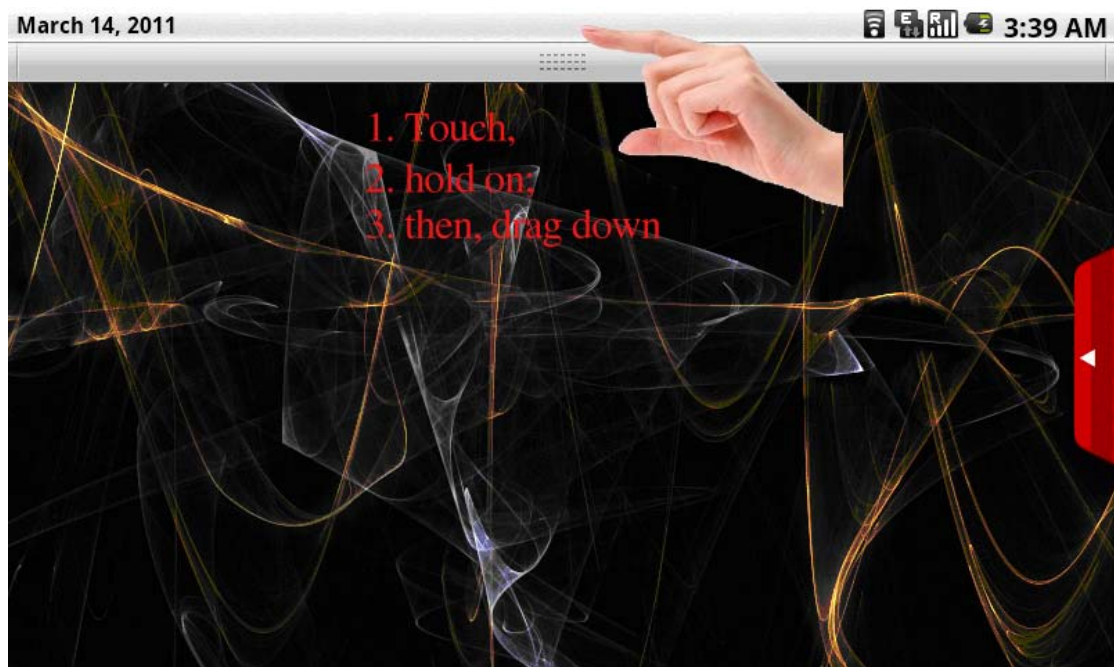

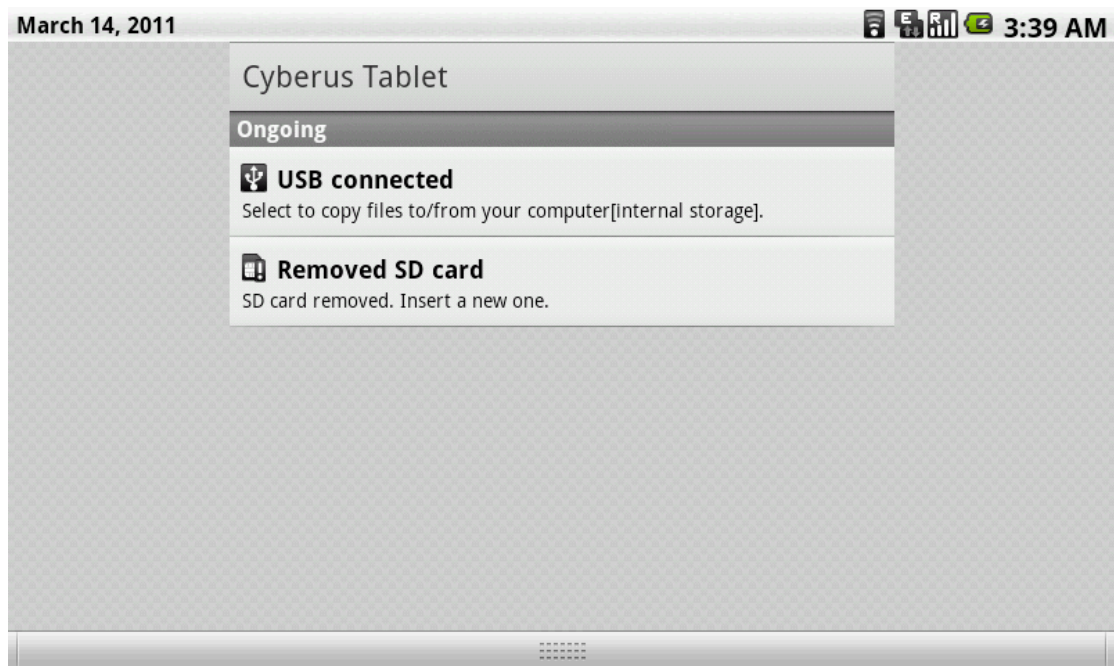

1） Connect your tablet to computer with using USB cable

2） Touch and hold on the info bar, you will see below interface

3） Hold on and drag down, you will see below menu on your tablet

4） Touch "USB connected", you will see below menu

5） Touch "Mount", on your computer's screen, you will see Cyberus Prompt, this is your tablet's internal memory room, you can manage your files here with using your computer

6） After managing operation to your memory, repeat the operation 2）3）4）, below interface will appear on your tablet,

7） Touch on "Turn off USB storage", below interface will appear,

8） Touch on "Turn Off" , then, you can go back to the normal interface.

*We strongly recommend that you buy a MiniSD card and plug it into the slot on your tablet because many online apps are defaulted to setup on SD card. With the SD card, you will get more entertainment.
